WORK EXPERIENCE

Swaran Soft (AI Engineer Intern)

June 2025 - present

Designed a sophisticated Retrieval-Augmented Generation (RAG) chatbot using LangChain to efficiently retrieve and synthesize information.

Automated the HR hiring process with an AI-powered system that uses LangGraph for complex workflows and n8n for seamless integration.

Developed an automated lead generation and outreach system, from scraping and data cleaning to sending targeted outreach emails with UTM tracking.

Developed the company website, managing data and automation flows by integrating Lovable with n8n and Supabase.

SKILLS

Languages	Python, Java, JavaScript
AI/ML	LangChain, LangGraph, Scikit-learn, TensorFlow, NumPy, Pandas
Databases	MySQL, PostgreSQL, MongoDB
Web & Backend	Spring Boot, JWT
Tools	PyCharm, VS Code, n8n

PROJECTS

RAG Chatbot

Designed a sophisticated Retrieval-Augmented Generation (RAG) chatbot using LangChain to efficiently retrieve and synthesize information.

AI-Powered HR Automation

Automated the HR hiring process with an AI-powered system that uses LangGraph for complex workflows and n8n for seamless integration.

Automated Lead Generation System

Developed an automated lead generation and outreach system, from scraping and data cleaning to sending targeted outreach emails with UTM tracking.

EDUCATION

2021 - 2025 B.Tech in AI & ML at Chandigarh Engineering College, Jhanjeri (CGPA: 7.29/10.0)

CERTIFICATIONS

Python for Data Science (IBM) Applied foundational Python syntax, including control flow, loops, functions, and data structures for data science tasks.

Big Data (IBM) Developed foundational knowledge and practical skills in managing and analyzing large-scale datasets.

Introduction to Containers, Kubernetes, and OpenShift Gained hands-on experience with containerization, orchestration using Kubernetes, and deploying applications on OpenShift.
